PROJECT EXPERIENCE

Project Time Keeper— Activity Tracker for Employees

- Designed and implemented an application for employees to keep track of hours worked on clients and projects
- Offers multiple options for tracking hours, including timer functionality and batch time entry
- Provides a summary of hours worked over a pay period with the ability to export data and begin a new work period
- Built using Java with Spring Boot and Thymeleaf with persistent storage secured in MySQL database

WORK EXPERIENCE

Barista — Books-A-Million, Hazelwood, MO

November 2014 - July 2015

- Interpreted customer orders and accepted payments while operating industry standard POS system
- Crafted and rapidly delivered satisfying beverages and baked goods
- Maintained a clean and sanitary work station in order to facilitate high quality product creation

Bookseller — Books-A-Million, Hazelwood, MO

November 2014- july 2015

- Designed, constructed, and organized consumer facing displays to highlight promoted products.
- Kept extensive knowledge of store layout and product location to quickly and easily place goods in the hands of customers
- Ensured the checkout lines, counters, and shelves were organized and product could be accessed easily
- Provided outstanding customer support from the moment patrons entered the store, through checkout, and until departure.
